Sanitary Container SC 30

Cleaning and hygiene for the task forces on site

The mobile containerized sanitary unit SC 30 has the most modern complete system for personal hygiene under extreme climatic conditions. The sanitary container SC 30 is sturdy, functionally safe and immediately ready for use. In the same way as the professional stationary plants, it fulfills all requirements at a high hygiene standard under field conditions.

Mobile hygiene system for any site

The newly developed containerized sanitary unit SC 30 is ready for use in a short period of time anywhere and thus makes complete sanitary treatment of at least 30 persons per hour at the highest hygiene standard under field conditions possible. The necessary sanitary components are installed ergonomically optimally.

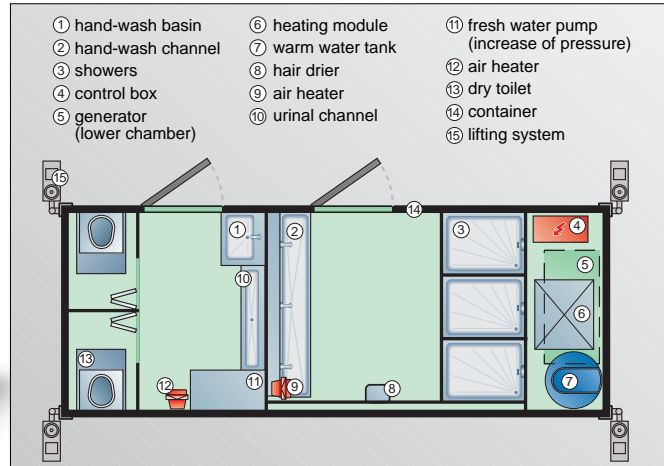

The built-in noise-encapsulated generator ensures that the sanitary container can be used independently with full sanitary capacity in permanent opera-

tion anywhere after fresh water supply has been established.

The washing and shower places fulfill the highest requirements in personal hygiene and user comfort. Only high-quality materials (e.g. stainless steel, aluminium) were used for the components of the sanitary container.

Technical Data		
Dimensions of the container	length	6.058 mm
	width	2.438 mm
	height	2.438 mm
Total mass	approx.	8.000 kg
Operational temp. range	-32° C to +49° C	
Lift support system	max. lifting height	1.650 mm
	standard:	manual drive
	option:	electrical drive
Sanitary components	washing places	3
	shower cabins	3
	hair drier	1
	urinal channel	1 (for two persons)
	toilet cabins	2 with dry toilets
	hand wash basins	1 (in the toilet area)

Further Kärcher systems for civil defence and disaster control

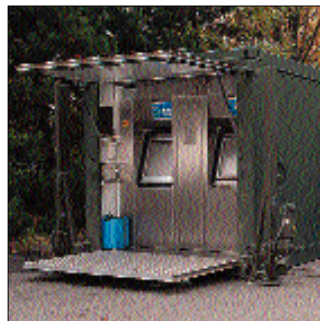

Container kitchen HMCK

Eating as if you are in a restaurant. Civil defence and disaster control task forces must be immediately on site worldwide. Immediate meals of good quality ensure moral and readiness for action even under the most complicated conditions.

Modular field kitchen MFK 250

Mobile catering system with the latest kitchen and vehicle technology and uncomparable logistics. Up to 250 people can be supplied with a complete menu within 2 hours anywhere in the world.

Mobile Laundry CFL 60

The mobile laundry system provides clean and hygienic clothing and hospital linen always and everywhere. This system was developed and tested by the experts of the Federal German Armed Forces and proven during intern. UN and NATO actions.

Mobile Laundry TFL 25

This mobile laundry is able to clean and dry dirty laundry effectively anywhere. The washing and drying capacity of the laundry is approx. 25 kg dry laundry per hour. Only one trained person is needed for operation.
